What makes Infinite Care Network different?

All our carers receive professional, specialised training before they meet our clients. We always match the best carers to your specific requirements, offering you real care solutions and care plans specifically designed to support your family's needs.

Free, no-obligation care assessments

Request to have a member of our team visit you and carry out a full assessment of your care needs. This will give us an opportunity to get to know you and understand any personal preferences that you may have, in addition to the formal care and support you will receive.

Funding your care: Options available to you

Many people presume that receiving care in their own homes is beyond their financial means, but this is not always the case. There are a variety of funding options available that can help you or a loved one to remain in the comfort of your own home.

Why choose Infinite Care Network as your domiciliary care provider?

Infinite Care Network specialises in providing home care to dependent adults – carefully matching carers to meet the needs of our clients.

Minimum visit time

For you to receive the best quality of care, we believe a visit from our staff should never feel hurried. Depending on your location, minimum visit times range between 1 to 4 hours in order to uphold safety in your environment. This is especially for the elderly or those with physical disabilities.

We are passionate about building genuine, trusting relationships. Our staff offer not only personal care but a trusting relationship. Customisable visit lengths, modified to suit your requirements, ensure you get the most out of your care plan. From daily visits to live-in care, we help with domestic chores, community trips or checking you have everything

Infinite Care Network and personalisation

In 2007, the Government published an agenda called 'Putting People First', which dictates how care providers should approach your independence, offer you more choices and control over your life in all situations. We offer more than help with personal budgets; we give informed advice and encouragement, vital to making the right decisions about your life.

Infinite Care Network is as adaptable as our staff, preferring to find solutions to problems rather than dwelling on them. We encourage meetups to discuss any challenges and identify solutions, ensuring our services correspond with the Personalisation Agenda.

We will consult with you every step of the delivery of your care. Our domiciliary services strive to achieve the best possible outcome for you, whether financed by the council, independently or by personal budget holders. The support we offer is not limited to personal care. A broad range of services (such as domestic help, household management, day trips to helping organise a holiday) is available.

How our service is delivered:

The steps below highlight the fundamental phases that Infinite Care Network follows to deliver a tailored care service.

1. We receive your enquiry, examine your requirements and specify an overview of the services we offer, as well as a summary of prices.
2. A Infinite Care Network assessor will visit you to take a care and risk assessment. After this visit, a care plan will be presented.
3. We finalise your care plan with you and your family.
4. We select staff members to support you according to your needs and organise a meeting if any additional preparation is required.
5. Your care service begins.

***We realise that in an emergency, a care package must start immediately. In this event, we will condense our service process and begin an immediate assessment to assist with an earlier response.**

Funding your care

Though it could be fair to assume personal care is an expensive service, you can benefit from various finance options, which are available to ensure you or your loved one remain in the comfort of home. Funding from your Local Authority or the NHS Continuing Healthcare Team is an option if you qualify. Below is a brief explanation of the types of support available.

Personal Budget is a lump sum set aside to cover your healthcare requirements. You can accept the amount personally as a direct payment or request your local authority to use this money on your behalf. If you wish, your budget can be allotted to a trust fund and managed by a family member or professional social worker.

Personal Health Budget is an allowance made to those with a recognised health concern. The NHS currently offers three options for a Personal Health Budget: Notional Budget, Real Budget Held by Third Party, and Direct Payment.

Individual Budgets is similar to a Personal Budget, this can be a more flexible option involving other sources of support. It includes Supporting People, Disabled Facilities Grant, Independent Living Funds, Access to Work and Community Equipment Services.

Direct Budget puts you in complete control of your care package and provider. Finances are given to you directly to buy services for your care needs.
